HSE Trident - Front

Standard Series Tower Speaker comes fully assembled and ready to install. The composite enclosure is a Gel Coat finish available in three standard colors (Black, White and Viper Red). Custom colors available typically at no additional cost and subject to availability. This model comes standard with stainless steel hardware, and black mesh grills.

HSE Trident Black, the most popular color!

Medallion Series Tower Speaker includes the components provided on the Standard Series with a few upgrades, which make it stand out. This model includes the choice if either grill shown below and a two tone gel coat paint option and color matching provided correct paint color codes are available. A two tone paint option as an example would be flames in one color and the enclosure being a different color. Other paint schemes are possible depending on your imagination.

Black Mesh

Polk Momo

About HSE:

The owners of HSE have been in many facets of the boating industry involving boat restoration, product design and fiberglass construction for over two decades. HSE is active in coaching youth wake board camps and competing in local wakeboarding competitions. The TRIDENT Series Pro Audio Tower Speaker System utilized CAD design and CNC laser technology producing the optimum speaker volume and style used for developing the tooling from which the mold is based. All the components and vendors are US based companies.
